Shortcodes & Blocks

Shortcodes & blocks provide you with additional ways to insert LearnDash content into your courses, pages, posts and other custom post types. This article will list out every piece of dynamic LearnDash content you can add to your site, and explain how to do it with both a shortcode & a block.

Creating a certificate? Check out our certificate shortcodes here »

Table of Contents [show]

What's the Difference?

Shortcodes

The original way to add dynamic content into the WordPress editor

Can also be used to insert LearnDash content into page builders

Contain options (also called parameters) to customize the information displayed

Here's an example shortcode, with one parameter:
